

In order to save space the following modules were changed:

mm.h

access.c

- Converted the following three functions to macros:
get_cam1_10, get_mon, get_kbd

alarms.c

- Added the following functions to handle the merged menus:
get_contact_spc_parm, get_contact_parm, set_contact_spc_parm, set_contact_parm
- Removed the following functions(using a variable *offset* where the functions where called):
get_alm1_8_row, get_alm9_16_row

clock.c

- Removed the following function(not needed anymore because of the changes made to the TIME/DATE menu):
get_date_parm
- Changed the following functions to reflect the changes made to the TIME/DATE menu:
get_time_date_parm, set_menu_time_date_parm, init_time_date
- Added Spanish strings to the following function:
get_abrv_month

keyboard.c

- Added the following function:
reset_kbd_control
- Added Spanish strings to the following function:
remove_kbd
- Removed the option to turn on/off Zone scans from the ASCII port(It is not necessary) from:
process_keyboard_input

macros.c

- Added the following functions to handle the merged menus:
get_macro_presets_parm, set_macro_presets_parm

main.c

- Changed the `copy_right_string`.
- Changed the following functions:
delay,
- Changed the magic value and added the `init_language` function to:
set_sys_defaults

monitors.c

- Added Spanish strings to the following function:
disp_mon_state

newmenu.c

- Added the following four variables:
`language`, `input1_8`, `input17`, `NumberStrings`
- Changed the following macros to allow the Spanish strings:
`ARGPART`, `LABELPART`, `MENUITEM`, `RETURN`, `SET`, `MSM_CAM_ITEM`,
